

X-T Monitor

Welcome to X-T monitor, X-TREME 6G's newsletter, which gives an overview of the project's advancements and key news, while shedding lights on key developments happening within the 6G ecosystem in Europe.

This newsletter will be produced and published on a regular basis, depending on the project's activities. For more precise information, do not hesitate to visit our website, as well as our LinkedIn page, which contains everything the public needs to know about us and our mission.

Enjoy the reading!

Events

- Six months after our kick off in Grenoble, our partners will be able to present X-TREME 6G's first results and key orientations, at four major occasions, and all around the globe: the SNS JU's EUCNC and 6G summit in Poznan, between June 3rd and 6th ; IndTech25 event in Krakow, where X-TREME 6G's contribution to the digital and sustainable transition of the European industry will be highlighted; and the ICC conference in Montreal, where our represent from Politecnico di Milano will discuss with any curious mind about the origin, the mission, and the desired outcome of our project . And last, but not least, X-TREME 6G's partners will all meet on June 25th and 26th under the care and organization of our partners from the University of Patras and p-net, for our second consortium meeting, Peloponnesian style ;)
- Our coordinator, Didier Belot, from ST Microelectronics, took part in a reunion gathering all the call 3 projects funded by the SNS-JU; aimed at maximizing the visibility and efficiency of all those projects through the initiation of synergies and the exchange of insights and experiences. Under the sun of Athens, this was the occasion for X-TREME 6G to gather valuable information on how to collaborate within the SNS-JU ecosystem for the development of innovative, network-centric, and democratized technological infrastructures.

Deliverable and milestone status

- Brace yourself! X-TREME 6G's first public deliverable is to be published at the end of September. Under the coordination of our partners from Nokia Italy, we can guarantee you that this document, entitled "Platform architecture definition and Use cases", will fill our project with a dynamism that will keep us thrive until the end of the SNS programme and beyond. More information to be communicated soon.

Key 6G news

- Europe's main telecommunication operators joined voices to issue a compelling appeal to EU policymakers, warning that the continent's digital competitiveness hinges on urgent access to the full upper 6 GHz band for mobile use. This joint call includes one of X-TREME 6G's partners, the French telecommunication group Orange. For more information, click on this [link](#).
- Should you be interested in the SNS-JU's 2025 call for proposals, an "info day and brokerage" online event will take place on May 23rd between 10:00 and 17:30. This event will gather Speakers from SNS JU, European Commission and 6G Smart Networks and Services Industry Association (6G-IA) , who will provide detailed insights into the Calls ambitions and focus, evaluation and award processes.
